

$$\text{ERROR max} = 2 \times \frac{100}{\sqrt{n}} \%$$

n = número de células contadas

El error en el conteo celular depende del número de células contadas a través del microscopio.

Reference : Javornicky (1958), Lund et al. (1958)

\* Error calculado con un intervalo de confianza del 95%

<u>Cells Counted</u>	<u>Error *</u>
5	89%
10	63%
15	52%
20	45%
25	40%
30	37%
